- What does the outcome *look like* when it occurs?
- How do you know it has happened?
- Is the wording of each indicator sufficiently specific?
- Is the wording clear?
- Does it tell you what characteristic or change you will count/ measure?

NOTE:

- **There is no right or wrong set of measures for any given outcome.**
- **We suggest focusing on one or two outcomes only.**
- **We suggest establishing 2 indicators for each outcome.**
